DETAILED ACTION

Specification

1. The title of the invention is not descriptive and is therefore objected to. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested:

SYSTEM FOR DISPENSING INFLATED PLASTIC DUNNAGE.
2. The disclosure is objected to because of the following informalities: There is no continuing data mentioned on page one of the specifications. Appropriate correction is required.

Claim Objections

3. Claims 36 and 40 are objected to because of the following informalities: In claim 36, step e), the term "siad" should be corrected to "said". In claim 40, line 2, the term "is" should be deleted.

Appropriate correction is required.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 36-52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-22 of U.S. Patent No. 6,527,147;

Claims 53-56 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 17-20 of U.S. Patent No. 6,527,147;

Art Unit: 3721

Claims 36-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 10-11 of U.S. Patent No. 6,672,037.

Although the conflicting claims are not identical, they are not patentably distinct from each other because a person having ordinary skill in the art would have found the claims to have been obvious variations of the claims of the patents. The claims of the patents and the claims of the present application are both directed to a system for supplying inflated plastic dunnage to a hopper to be dispensed via rotating brushes. While the claims of the present application and the claims of the patents may have variations and differences in their scope and terminology, the variations and differences would have been obvious to one having ordinary skill in the art.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 36-52 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 36, steps (d & e) claim the dispenser device to receive, rotate, and dispense dunnage units "one at a time". Nowhere in the specifications is support found for a novel dispenser device that transports dunnage units sequentially and one at a time as claimed. Specifically, page 7, lines 15-22 describe the "novel arrangement for dispensing units" and do not support the claimed subject matter.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment (PTO-892) for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
